**sb Glossary**

A glossary database is created for your exclusive use. Members of your company, who are nominated by you, can log into the glossary under three different roles: user, feeder and validator.

The updated online glossary is available to users nominated by you.

„Feeders" nominated by you feed terminology into the glossary in the source language, and if known, also in the target language.

German<>English Glossary

An updated glossary is sent to you in intervals (e.g. weekly) in different formats.

In intervals (e.g. weekly, new entries are checked and translated/confirmed by a validator nominated by you together with smith-bauer.
Then these translated/confirmed terms are fed back into the glossary.
